

SafeCash Retail Deposit Smart

Smart cash deposits at your fingertips

A smart and secure cash deposit unit offering faster deposit times and increased capacity: discover the difference that a cash-handling system designed specifically for the needs of retailers can make to your day-to-day operations. As the number of cash transactions continues to rise worldwide, retailers need a more reliable and efficient cash-handling system to protect their business from the costly aftermath of theft and robbery, while also optimising processes to save time and money.

The SafeCash Retail Deposit Smart offers you a completely standalone system, designed specifically for small- and medium-sized retailers. This unit is the ideal solution to safely reduce your cash holdings. You can rest easy knowing the sums deposited are validated immediately after your deposit is made, producing a detailed transaction report.

Smart cash deposits at your fingertips

Where security meets service

From a TFT touch screen, identify yourself using a 4-digit ID number and optional pin code. You can designate an unlimited number of users in the system and internal hierarchy enables different rights to be granted to each user. Simply make a deposit of up to 50 notes and the amount is immediately credited to your account. Then, a receipt is issued.

Stay up-to-date at all times

Continuously track your real-time cash level by using Gunnebo's web-based monitoring software. Either you or Gunnebo can host this software, which may be run locally or centrally. Numerous options for data export and reporting are available.

State-of-the-art protection

Verify the authenticity of your notes via the integrated banknote recognition software system, certified by the Deutsche Bank and by ECB•S, which places them into an interchangeable cassette. Optional safe bags can be used to be placed inside the cassette to transport the money. Rejected notes can be put in an envelope and manually documented values are booked automatically.

BENEFITS AT A GLANCE

- Easy integration of the system into existing workplaces
- A completely autonomous system
- UL safe with a mechanical or (optional) electronic lock
- Integrated banknote checker for depositing bundles of up to 50 notes
- Euro notes verified by a note recognition module tested by the Deutsche Bundesbank
- Barcode-capable interchangeable cassette for up to 1 200 banknotes
- Thermal printer for receipts
- Manual safe bag deposit as a backup solution
