CashControl Managed Hosting

Professional External Management of Cash Handling Solutions for Retailers

Cash handling solutions allow retailers to focus on their customers instead of on cash handling. To achieve this, monitoring the technology and the smooth operation of the cash handling processes is important. However, for a small retailer internal resources are often too limited and for large retailers a significant investment in IT infrastructure is required.

Through CashControl Managed Hosting, Gunnebo can externally manage and monitor whole cash handling solutions online, providing high uptime and reducing operating costs.

Clients leverage Gunnebo's cash handling expertise and receive a high level of professional service. Problems are spotted early, preventing unnecessary and costly interruptions in the customer's operations.

BENEFITS AT A GLANCE

- Fast implementation
- Scalable infrastructure for future growth
- Reduces capital and operating expenditure
- Higher system up-time
- Leverages Gunnebo's cash handling expertise
- Data security and back-up routines

Gunnebo ensures the right level of security with hardware redundancy, back-up services and data encryption.

The CashControl platform also allows greater connectivity with banks and CIT partners. Existing clients have received large benefits from this feature such as same-day credit and more cost-effective CIT pick-up routines.

- **Monitoring and Remote Service**
CashControl allows external monitoring of cash handling systems with a level of service to suit your needs

CUSTOMER FEEDBACK

"Gunnebo is responsible for the operation and we don't need to worry about it. The service includes working proactively – calling up a store when there are user mistakes and carrying out necessary maintenance. Our service costs will certainly decrease."

**Klas Bølle, IT Manager
OK-Plus, Denmark**

"The system handles and monitors money when citizens pay for driver's licenses or passports with cash. Our employees do not need to handle cash anymore. Safety and efficiency have improved."

Mark Jager, Team Leader, City of Gemeente Zaanstad, Netherlands

CUSTOMER TYPES

Pre-Rollout Project
Fast implementation and low investment with scalable infrastructure for future growth.

Franchiser
Low resource demands placed on central IT and ability to separate central and store data.

Retail Chain
Significantly reduced operating and administration costs. Use Gunnebo's experience and knowledge.
