

## SafePay™ CR2

Next generation coin recycler for closed cash handling

SafePay™ CR2 offers customers a quick and easy way to pay with cash in any type of shop. The unit's large coin bowl allows customers to pay with whole handfuls of coins in one go. SafePay CR2 rapidly counts, sorts and authenticates the coins, returning any change or invalid items and securely storing the rest for recycling.

SafePay CR2 can be used at traditional manned checkouts or at self-service payment stations. The unit has a communicative, high-resolution display which gives clear instructions on how to pay, and has been designed for accessibility.

Cash differences are eliminated since all transactions are registered – payments, dispensed change and even refills – and coins are inaccessible even during maintenance.

### BENEFITS AT A GLANCE

- Fast coin deposit and high storage capacity
- Ergonomic design with clear customer display
- Coins never exposed, not even during refilling or maintenance
- Simple staff maintenance
- Designed for self-service

The system is designed to automatically fix coin jams and allow store staff to quickly solve remaining problems without exposing the stored cash.

Together with the SafePay NR2 note recycler, SafePay CR2 forms part of the SafePay closed cash handling solution for retailers.

Next generation coin recycler for closed cash handling

## Product Features

### Easy to Use

- High-resolution graphical display for clear communication with customer
- Large coin bowl for simple payment
- Store can customise the messages displayed

### High Capacity

- High storage capacity – one refill in the morning lasts all day
- High speed for faster payment and refilling
- Customer deposits automatically refill the machine thereby reducing coin purchases

### Closed and Secure System

- Cash never exposed during refilling or maintenance
- Coins can remain in the system overnight to reduce back office work
- Verification and counterfeit control using precision sensors

### Simple Maintenance

- Automatically clears coin jams
- Staff can solve many problems quickly themselves
- Plug and play replacement of key parts

## ABOUT CLOSED CASH HANDLING

SafePay™ CR2 forms part of the SafePay closed cash handling solution for retailers. Closed cash handling protects cash from the moment a customer pays all the way to the cash-counting centre – no gaps in security and no weak links in the chain. It replaces manual tills with a much more secure system which recycles cash and removes cash differences.

Gunnebo is a pioneer in this field and has worked closely together with leading European retailers to develop SafePay – a reliable, secure and efficient closed cash handling system.

## TECHNICAL DATA

Dimensions	451x130x1318
